## Is evolution-based science reliable?

Origins science today, is almost entirely wishful thinking to support an evolutionary worldview. The big bang, star and galaxy formation, biological evolution, planet formation and geology are 'force-fit' into the evolution paradigm. Yet the stories of how these things "might" have evolved formed have become "facts" in the hands of evolutionists.

The Creation Study Group (CSG) of Greenville sponsors weekly study groups on science topics including astronomy, genetics, biology, logic, geology, cosmology and more. We currently hold two meetings each week on the same topic; one on Tuesdays at 7:00 PM (6:15 for dinner) at Sticky Fingers at 3 Point Dr (off Woodruff Rd), and Thursdays at 7:00 PM at Lutheran Church of the Good Shepherd at 1601 Pleasantburg Dr. For a calendar of topic, check the CSG website. If you would like to host a meeting, please contact Tom Pender at 828-527-3869. We look forward to seeing you. Do all to the glory and honor of Jesus Christ our Lord.
